

Armoured Loose Tube Cable (Central Bundled, Outdoor) GYXTW

Features

- The two parallel round steel wires enhance tensile strength, tension-resistance and crush resistance.
- Good mechanical performance, jacket with good ultra violet resistant property.
- Small outer diameter, lightweight, tight structure, excellent bending property and suitable to installation and operation.

Applications Long distance and Local Area Network(LAN) communication

Laying method Conduit, Aerial

Temperature range -40°C - +70°C

Specifications

Fiber Count	Outer Diameter (mm)	Nominal Weight (kg/km)	Max. Tensile(N)		Min. bend Radius(mm)		Max. Crush Resistance
